IGA Migration Jumpstart Program

Pick-up Your Speed of IGA Modernization Initiatives

7/10

IGA Migration
Initiatives Fail

Modern Identity & Governance Administration (IGA) platforms are designed to drive changes for a secure and efficient IT ecosystem. Despite their incredible benefits, many enterprises are slow to get on board, fearing deployment failure.

Ensure your Success with Proven 7-Step Approach to Modernize Legacy IGA

1

Assess Your Current IGA Platform

Avoid jumping directly into RFPs and vendor selection before taking inventory of your own IGA maturity, strengths, and gaps.

2

Discover New IGA Needs

Discover new ways IGA can optimize existing business processes.

3

Define the Transformation Scope

Narrow down the scope of the project based on budget and timeline constraints.

4

Outline Success Metrics

Outline quantifiable success metrics around administrative efficiency, cost reduction, employee productivity, continuous compliance, etc.

5

Select the Right Vendor

With these metrics in place, it's time to jump into RFPs and select a vendor that fulfils your criteria.

6

Create a Migration Roadmap

Craft your implementation road map, detailing when and how you will implement the new IGA solution.

7

Accelerate Implementation by Selecting the Right Partner

Partnering with the right vendor can pave the way for a timely and successful transition.

Persistent Can Help You Right from Step 1

IGA Migration Jumpstart Program

Assessment

- \ A complementary discussion with our IGA experts who have 15+ years of experience.
- \ Review key use cases and prioritize which entities/relations to migrate

Automation (Sneak Peak)

- \ Deploy Persistent's automation framework in your environment
- \ Connect to IGA instance in your environment to generate a current state report which gives details of entities/relations in your IGA platform
- \ Automated migration of a few legacy entities and relations to a next-gen platform

Configuration/Testing

- \ Configure 1 trusted source of identities
- \ Configure provisioning for up to 2 connected and 10 disconnected systems

Acceptance Testing/Launch

- \ Assist with acceptance testing and launch
